

Modular Electronic Cabinets and Work Stations

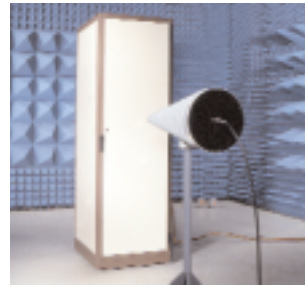

EQUIPTO
Packaging solutions for electronics **Electronics Corporation®**

Catalog Contents Overview

Heavy Duty
Total quality, our top-of-the-line

Shielded Enclosures
EMI/RFI

Earthquake Reinforcing
Seismic hardened to Zone 4

Solid System
Cost-saving, non-removable side panels

Challenger
Economy, versatility, modularity

Desk Systems
Specifically engineered
for electronics

Work Stations
Functional to increase productivity

Instrument Cabinets
Eye-appealing with strength,
modularity

Express 5 Day Service
When you need it fast!

Equipto Electronics Corporation, packaging solutions for electronics

The effectiveness, reliability, durability and cost of an electronics system can depend significantly upon the packaging that houses it.

Since its founding in 1960, that belief has been the guiding principle that has made Equipto Electronics Corporation the leading innovator and supplier of standard and custom designed packaging for electronics. That belief is best expressed in our two most valuable assets — superior products and customer service.

Some of the ways we assist customers in solving their packaging problems include:

- One of the largest and most experienced teams of electronics' packaging design engineers who consult with you by phone, e-mail and fax at no charge.
- Engineering support for major projects at your location.
- Reproducible engineering drawings delivered electronically.
- Multiple lines so extensive you can usually find exactly what you need without customization.
- Cabinets that meet earthquake, EMI/RFI, FCC, Military, TEMPEST, EMP and European EMC requirements.
- Hundreds of accessories in thousands of sizes.
- A free 30-day evaluation that affords you the opportunity to load and test your equipment in our unit at your facility.
- ISO Certification
- Express 5-Day Shipping
- 12 standard colors in any combination, or any color without extra charge or delay.
- Experienced customer service people and factory-trained sales representatives.

Equipto Electronics also assists its customers with a wealth of free information. These include our full-line catalog, easy to use specifying guides, an EMI/RFI tutorial, 800 line phone assistance, an interactive Web site, and more.

On-line quotes

One of the features of the company's interactive Web site is that engineers can use the convenience of their computers to design, spec, view, price or print-out everything they need to know about Equipto Electronics enclosures, 24-hours a day, every day of the week.

The easy-to-use interactive Web site includes technical drawings and an "Easy Quote" form that provides the user with an almost instant parts list and prices on any electronics package he or she specifies. Another feature of the site lets a user easily change cabinet dimensions and receive another quote for a totally different assembly.

The company's Web site can be used as a resource for engineering, to establish bills of materials, determine budgets and more.

E-mail lets users ask questions. Equipto Electronics' full-line catalog can also be requested through the site.

Equipto Electronics Web site can be accessed at www.equipto-elect.com.

Saving Customers Time and Expense

With Equipto Electronics' expertise in engineering electronics packaging, a number of companies find added value by turning to us to design and build their total packaging solution.

This might include sourcing and building components into an Equipto Electronics cabinet such as power strips, AC power distribution and control systems, cooling units and more. In their designs, Equipto Electronics' engineers meet

or exceed client specifications for outsourced components. If special needs can be manufactured in Equipto Electronics' fully automated plant, drawings and costs will be provided.

Customers using our value added services enjoy manpower, inventory, and cost savings with a significant reduction in lead times.

Well positioned

Headquarters, including management, engineering, manufacturing and administrative offices for Equipto Electronics is in Aurora, IL, near Chicago along one of the area's high tech corridors.

Visitors, who have come to us from all over the world, find the company easy to get to and appreciate the convenience of being able to inspect, plan and work with us at just one facility. In addition, our network of U.S. and Canadian representatives are factory trained to assist and offer suggestions in your office. If needed, they will bring an Equipto Electronics engineer along for consultation.

For a combination of quality products and quality service that can help you create the right package for your electronics, call Equipto Electronics today, or visit our Web Site.

How we can assist you in solving your packaging problems

When looking for a vendor to provide your electronics packaging, it pays to find a partner — one company that can provide the products and services to complete your projects and make your job easier.

By partnering with Equipto Electronics, you enjoy:

• **A range of products.** Our products include sub-racks, such as card cages and chassis, large enclosures including racks, cabinets and desks. These well engineered and tested products meet the most demanding requirements such as seismic hardening and TEMPEST level shielding.

• **Custom capabilities.** Our manufacturing is very flexible requiring minimum set-ups for custom products. Our on-staff designers can provide you with custom modifications to standard products or design a new product for you. We can send and receive drawings and work with most electronic file formats in use today.

Electronics engineers can use the convenience of their computers to design, spec, view, price or print-out everything they need to know about Equipto Electronics enclosures, 24-hours a day, every day of the week through the company's Web site: www.equipto-elect.com.

• **Quality.** Equipto Electronics has been ISO 9000 registered since 1993. Through continuous improvements we have upgraded our registration to the 9001 standard covering standard product design. Our customers consistently rank our quality at 99% good or excellent.

• **End-to-end production.** From sheet steel to complete assemblies, our facility provides a complete range of manufacturing services. While other companies may punch and form a panel, few have invested in the variety of manufacturing technologies that Equipto Electronics has. Our in-house processes such as welding, painting (both wet and powder coat), silk screening, and assembly, shorten lead times and allow us to control both the project and its quality. As an example of our quality commitment, we are an Underwriter's Lab UL-508 panel builder shop. Our registration covers electrical work such as connector assembly and wiring permitting us to apply the UL label to products we manufacture.

• **One-stop shopping.** If we don't manufacture a component you need to package your electronics, we can purchase it from proven suppliers who meet our demanding requirements or from sources you specify. This provides you with a single supplier for your entire electronics package reducing your procurement problems and speeding your production process.

Equipto Electronics services available to you

- Design and engineering
- Modifications to standard products
- Appearance design
- Engineering drawings or CAD disks
- Documentation
- At-your-site product evaluation program*
- Regulatory compliance including:
 - NEBS TR 63
 - MIL. STD 810
 - MIL. STD 901
 - TEMPEST level EMI/RFI
 - UL 508A

**Equipto Electronics unique "Engineering Evaluation Program" makes our standard products available for evaluation at your facility for 30 days. Depending on your needs, we may even provide the product for destructive testing. Contact us to discuss this unique program.*

Visualization tools utilized by Equipto Electronics engineers can show how custom enclosures will look before actual prototyping. This allows multiple designs to be reviewed with the time and expense of actually producing prototypes.

Equipto Electronics offers total or tailored electronics packaging to make your job easier. By partnering with us you benefit from our engineering, purchasing, manufacturing, assembly and testing experience.
