

Introduction to Quiptron Modular Work Stations

Versatile, flexible and compatible for greater workflow efficiency

The Quiptron Modular Electronic Work Stations are designed to integrate your electronics into a functional and attractive workstation. The Quiptron design features more leg room, a wide range of tabletop widths and depths available, choice of four heights, no-sag no-sway construction. Quiptron's fine details give the customer premium quality without a premium price to pay. They include; threaded inserts in the laminated tops which prevent fasteners from working loose, Marproof panel mounting screws which prevent scratching of panels, double extension ball-bearing drawer slides, recessable mounting rails. Many colors and laminates are available.

Equipto Electronics human engineering realizes that all people are different and has developed Work Stations that are adjustable to meet these human differences. The goal is to stimulate workflow by providing more operator comfort with less fatigue. The Quiptron line of products is designed to incorporate the advantages of modular design to increase productivity. The product line includes; modular work stations, storage drawer compartments, pedestal compartments, work stations with electronic compartments, angular work stations and accessories. Please refer to Pages E14 - E18 for accessories.

The clean look, color-coordinated finishes, expandable versatility, and attention to detail of Quiptron products, gives you the personal choice to design a workflow arrangement that best meets your needs. Now you customize without paying the high cost of custom design.

The following table can help you select the best options to meet your needs. For more information on these products, please see the following pages. If you have any questions, please call (800) 204-7225.

Series WS5-Work Station with Electronic and Drawer Compartment

WS5 Work Stations feature both an electronic compartment and a desk compartment to create an office type workstation that allows for rack mounting equipment. Electronic compartments are furnished standard with a plain bottom panel. Grilled bottom panels are available. Unless specified otherwise the drawers will come mounted on the left and the electronic compartment on the right. **If you want the compartment installed on the left side and the drawers on the right side, please change the 'WS' portion of the P/N to 'WR'.**

Please see the accessory section to customize your work station with comfort edges or anti-static tops. Doors, panels, rear panels, casters and other accessories are also available.

See inside back cover for standard finishes and laminates. Custom colors and laminates are also available.

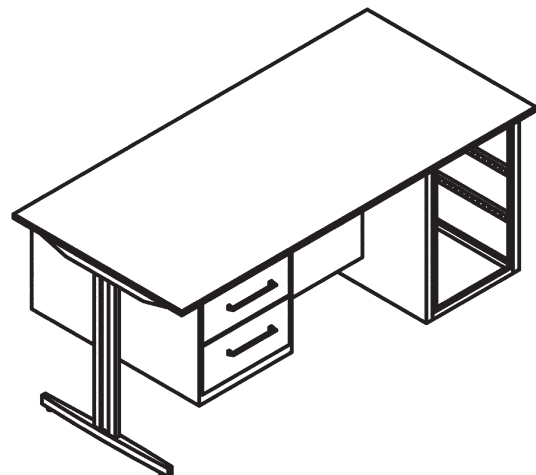

Work Station with Electronic and Drawer Compartments

Product Features

- ▶ Tops have threaded inserts to prevent fasteners from becoming loose
- ▶ Available in two standard widths; 19" and 24"
- ▶ Available in two standard heights; 26" and 29"
- ▶ Two-drawer compartments have storage and file drawers to accommodate hanging folders
- ▶ Three drawer compartments have (3) storage drawers
- ▶ Drawers are mounted on full extension ball bearing slides for easy access to contents
- ▶ Electronic compartments come with 4 adjustable mounting rail with standard E.I.A. hole spacing
- ▶ Available and finished in your choice of several colors and laminates

Electronic Compartment Doors/ Accessories

Electronic Compartment Doors

When ordering the Equipto Electronic Compartment Doors, please specify whether doors are to be mounted in the front or the rear.

Product Features

- ▶ Heavy 16-gauge steel construction
- ▶ Instantly removable by retractable, spring-loaded hinge pins
- ▶ Chrome and Black vinyl, modern-design door handles
- ▶ Hidden magnetic latching
- ▶ Mountable front, rear or both

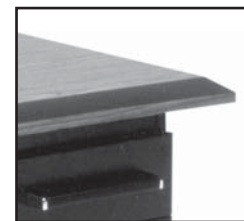

OS-0612-GC

Outlet Strip

The Equipto Outlet Strip is a wired, heavy duty 6 outlet strip with switch and UL approved components. The long-lasting indicator lamp denotes "power-on". The box contains a 15 amp circuit breaker with a 12' long 3-wire grounded service cord.

Comfort Edges

Comfort Edges can be added to the front edge of any work station to eliminate operator fatigue from sharp edges cutting off the circulation. Comfort edges can be ordered in the same laminate color as the top or contrasting color such as black. To order, specify in the description and add "-CE" to part number. Available in off-white standard color.

Example: WS1-3060-26P-CE work station with comfort edge.

* To specify, add hand (R / L) and style (P / L) to part number. If lock is required, add "-LK" suffix. When ordering, specify mount in the front or rear.

Static Control

Static Control Laminate is a decorative, clean melamine which rapidly dissipates static electrical charges and is suitable for clean room use. It is recommended for use in work areas which must be free of static electrical charges. Chemical and heat resistance is equivalent to that of non-conductive laminates.

When static charge items are placed on the laminate their charge is removed. No suppressed voltages reappear when the items are removed from the laminate surface. Each table top comes with a grounding kit and a 10' long ground cord with a one megohm resistor. You may order this product with the work station.

Product Features

- ▶ Surface resistivity of 10^6 to 10^9 ohms/sq. is standard. Other resistivities are available
- ▶ Dissipates a 5000 volt static charge in less than 0.05 seconds at 50% relative humidity.

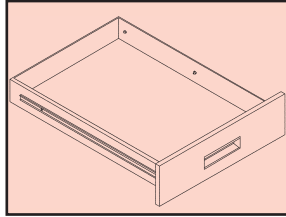

Equipment & Storage Drawers Pencil Drawers/Accessories

Equipment and Storage Drawers

Equipment and Storage drawers are designed to house test equipment, cables, accessories and other operational gear. The drawers ride on ball bearing extension slides having front disconnect. The drawer pulls are flush mounted with recessed finger grip.

Product Features

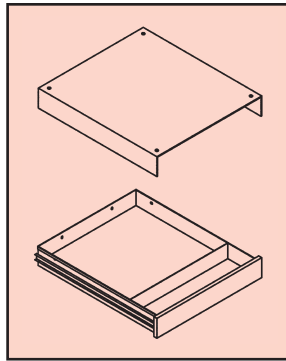

- ▶ Constructed of 20-gauge steel
- ▶ Available in 6 drawer heights
- ▶ Available in 25 1/2", 30 3/4", and 36" depths

Pencil Drawers

Product Features

- ▶ Heavy Gauge Construction
- ▶ Curved Pencil Trough
- ▶ Adequate room for 8 1/2" x 11" pads
- ▶ Ball Bearing Slides with Front Disconnect

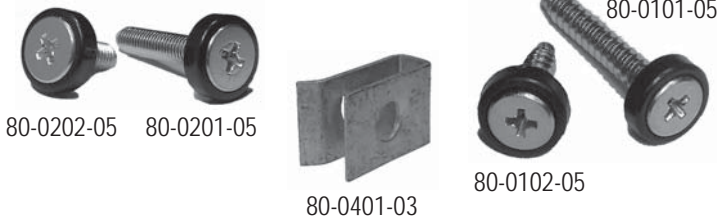

QPD-2800-000

Mar-Proof Screws

For *punched* Panel Mounting Angles. Screw 10B x 1 1/8" (80-0201-05) is used with 5/8" formed panels, while 10B x 5/8" (80-02020-5) is used with 1/8" flat panels. Screws and Speed Nuts® (80-0401-03) have Zinc Plating with Trivalent Chromium Passivation.

If *tapped* Vertical Mounting Rails are used, 5/8" Formed Instrument Panels are fastened to the mounting angles with 10-32 x 1" (80-0101-05) Phillips Head machine screws. 1/8" Flat Panels are fastened with 10-32 x 1/3" (80-0102-05) machine screws. Both screws have Mar-Proof recessed black nylon washers.

Casters

Quipton Casters provide great mobility with a twin wheel design. They are constructed of a sturdy bright chrome-plated die-cast hood with nylon wheels. Each caster has a mobility load rating of 75 lbs. and will add 1 1/2" to overall height. If you require Casters, please specify as follows:

- Plain**—EDC-0275-BCP
- Locking**—EDC-0275-BCL

Where the combined weight of desk and equipment exceeds 400 lbs., the Heavy Duty Swivel Caster should be used. The rated load capacity is 210 lbs. per caster. The Heavy Duty caster will add 3" to overall height of desk.

- Swivel without lock**—PC-1213-SP
- Swivel locking**—PC-1213-SL

*Add "—HD" suffix to desk part number

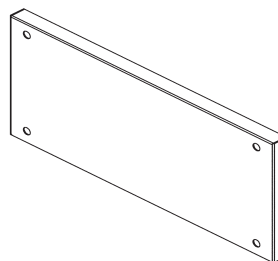

5/8" Formed Instrument Panels

5/8" Formed Instrument Panels

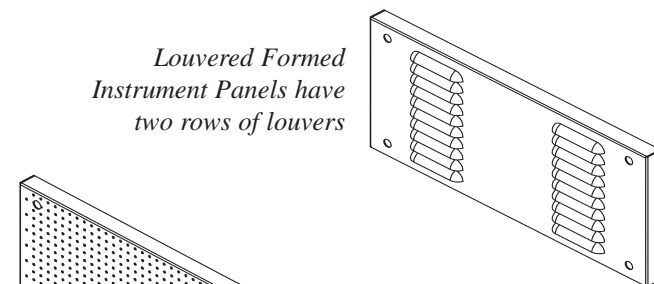

All of the Equipto Formed Instrument Panels are constructed 5/8" thick with a single flange. They mount directly to the Panel Mounting Angles, usually with sheet metal screws, with Mar-proof black nylon washers and Speed Nuts®, flush with the cabinet frame. Plain Formed Instrument Panels are available in nineteen heights. Louvered Panels are not available in heights less than 7", because the amount of square inches available are not sufficient to be practical. All Formed Instrument Panels are available in 19" and 24" panel widths.

Product Features

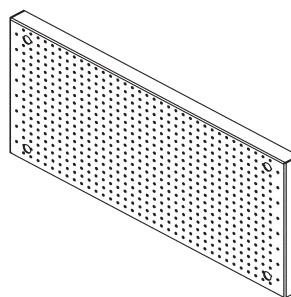

- ▶ Constructed of 16-gauge steel
- ▶ Available Plain or Louvered formed
- ▶ Available in 19" and 24" panel widths
- ▶ Perforated are constructed of 18-gauge steel
- ▶ Completely perforated with 1/16" diameter holes on staggered 7/64" centers

Plain Formed Instrument Panels available in 19 heights and 2 widths

Louvered Formed Instrument Panels have two rows of louvers

Perforated panels are ideal for releasing heat and complying with codes restricting size of openings

If mounting to punched vertical mtg rails, add a 'C' prefix to panel P/N Example: C20-0112-46

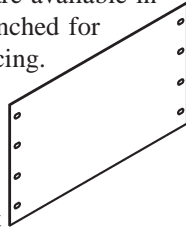

If mounting to tapped vertical mtg rails, add a 'T' prefix to panel P/N Example: T20-0112-46

1/8" Thick Instrument Panels/ Panel Shims/Panel Mounting Angles

1/8" Thick Flat Instrument Panels

The Equipto Thick Flat Instrument Panels are available in 1/8" thick steel or aluminum. They are punched for E.I.A. Universal Standard RS-310 hole spacing.

The Instrument panels are fastened with 10B Phillips Head sheet metal screws, using Mar-Proof recessed black nylon washers and Speed Nuts®. Flat Plate Instrument Panels are usually shipped attached to the cabinet frame in the locations specified.

*Complete the last digit of the panel P/N with one of the following choices:

2	w/hdwe for punched vertical mtg rails in desk
4	w/hdwe for tapped vertical mtg rails in desk
6	w/hdwe for shims & punched vertical mtg rails in desk
8	w/hdwe for shims & tapped vertical mtg rails in desk

Vertical Mounting Rails

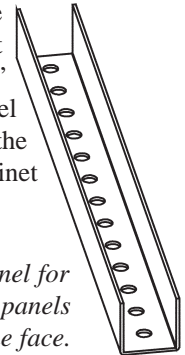

All of Equipto's Electronic Compartments are supplied with four vertical mounting rails, two are located at the front and two at the rear of the compartment. You may require additional rails or you may substitute tapped rails for punched rails. Please see the table below to select the part number of the vertical mountings you need to fit the electronic compartment you are using. The rails are furnished plated.

Visit our web site at www.equiptoelec.com for the latest technical data or a price quote

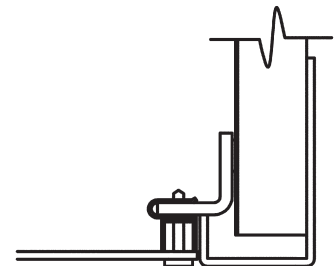

Panel Shims

Panel Shims are constructed of 16-gauge cold rolled steel formed into a "U" shaped channel. They are used to bring flat panels into alignment with the face of the formed panels when Flat Plate Instrument Panels are used in combination with 5/8" Formed Instrument Panels in the same panel area. They are usually shipped along with the flat panels which are attached to the cabinet frame.

A "U" shaped channel for aligning flat 1/8" panels with frame face.

Equipment & Sliding Chassis Shelves Chassis Guides and Supports

Equipment Shelves

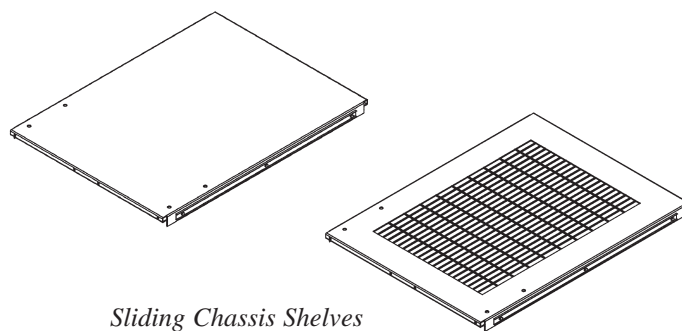

The Equipto Equipment Shelves are designed to provide a rugged support surface for heavy equipment. They are available plain or with a grill. The grilled area is 67% open, with rectangular openings 1/4" x 1 1/2", separated by a 3/32" web comprising most of the shelf area. Both plain and grilled shelves are formed of 16-gauge steel.

Equipment Shelves

Sliding Chassis Shelves

The Equipto Sliding Chassis Shelves are designed to provide easy access to chassis and other equipment. They are available plain or with a grill and are mounted on ball bearing slides with front disconnect. Both plain and grilled shelves are formed of 16-gauge steel.

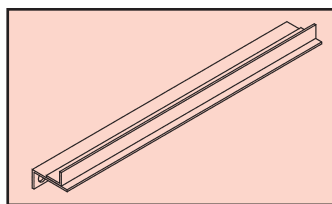

Sliding Chassis Shelves

Product Features

- ▶ Constructed of 16-gauge steel
- ▶ Available plain or grilled
- ▶ Available in 25 1/2" and 30 3/4" depths; 19" and 24" widths

Chassis Guides and Supports

The Equipto Chassis Guides and Supports are used to support and to guide heavily loaded chassis that must be moved into, or out of, a cabinet on an intermittent basis. The guide angle is adjustable from side-to-side to ensure alignment of the chassis with the panel opening to minimize possible damage to the chassis panel or to the cabinet face.

Product Features

- ▶ Support angle formed of 12-gauge steel
- ▶ Adjustable Guide angle formed of 16-gauge steel
