New R6 enclosure has highest EMI/RFI protection available

Independent laboratory tests results available upon request.

In the fields of intelligence and computer security, TEMPEST requirements, specifically NSA 94-106, is among the most stringent.

The new R6 electronics enclosure, developed by Equipto Electronics' engineers, not only meets but far exceeds the NSA 94-106 standard.

So great is the R6's level of EMI/RFI attenuation that during tests by an independent laboratory, the signal generator was checked to be sure it was working properly.

The R6 model tested included front and rear opening doors, a fiber wave guide inserted in the top of the cabinet, and an Equipto Electronics proprietary honeycomb filter in the bottom.

(see other side for more details)

Equipto's R6 enclosure — The highest protection for your electronics

Features

- Cabinet custom sized to your requirements
- Choice of front, rear or front and rear doors, panels or combination
- Four-point door lock system is easily operated
- Line filters/wave guides to meet your needs
- Field replaceable door gasketing
- Proprietary honeycomb air filter in choice of .5", .625", and 1" depths
- Fiber wave guide(s) as needed
- Adjustable mounting rails inside (punched, threaded or square hole)
- Choice of Equipto Electronics' Standard Supports or Unistrut
- Wide selection of accessories
- Custom cooling to meet your needs
- RoHS compliant

Unique door frame and lock receptacle insure leak-proof closing.

Enclosure can be manufactured to your requirements including choice of front, rear or front and rear doors, panels or combination.

Interior mounting rails are adjustable and available with punched, threaded or square holes.

Hinge design allows easy removal of door when opened.

Proprietary honeycomb filter mounted on the bottom of the frame.

Honeycomb filter is available in choice of .5", .625", and 1" depths

Fiber wave guide as seen from inside the R6 cabinet.

Because of the proprietary design of the Equipto Electronics R6 enclosure, please contact us for more details.
